

Mathematics

Lara Tosun

Submitted by Gabriel Pretel

Lara was outstanding both as a math student and as a math tutor. She finished the math sequence with flying colors, and she set a great example of enthusiasm and work ethic. Lara is very sharp and self-motivated, and she consistently showed great interest in understanding the subject matter thoroughly. Lara appreciates how math plays a very important role in scientific applications, and we know that she will continue her exploration of the connections between math and computer science after she transfers from SBCC. Lara also won the most recent Integration Bee (hosted by the SBCC Math Club). She is a member of a group of students that is doing independent study in topology, in preparation for the rigors of upper-division mathematics.

Lara has had a positive influence on many SBCC students because she has been a fantastic math tutor, both in the Math Lab and as a course-specific tutor. She helps students from all levels of math and always shows kindness, patience, and wisdom when tutoring. The Math Lab staff is very happy to have her as part of the team, and we will miss her when she transfers.

Lara is a very promising student, and we wish her the best as she continues her studies.
